Disclaimer

Connect Naturals is produced using natural wools and as a result of this, shade variation may occur between batches. If exact shade representation is required please contact the sales office for samples obtained from our current stock material. Natural shades may not perform under certain conditions and therefore consideration must be made by the specifier with regards to areas of usage and subsequent appearance retention. Please refer to our comprehensive Cleaning and Maintenance guidelines relating to your Newhey product.

Our Story

Newhey Carpets is a leading British manufacturer of contract carpets for the hotel, leisure and entertainment sectors. Applying 50 years of manufacturing and technical excellence, the company constantly embraces the very latest production techniques in order to deliver reliable, high performance products to its global customer base.

Driven by innovation, Newhey uses a mix of yarns and colours to develop unique solutions for commercial interior designers, all backed up by market leading after sales advice and support. The company is also at the forefront of the carpet sector in terms of reducing its carbon footprint through the development of low embodied energy. Newhey's advanced backing system utilises a unique solvent free application process to apply the revolutionary evobac, which is produced from 100% recycled plastic bottles.

Pile content:	80% wool / 20% nylon
Suitability:	Heavy commercial
Secondary backing:	evobac

Represents 0.5m x 0.5m

About the Collection

Along with the original Connect Naturals designs this collection now incorporates a basket weave design in five beautifully muted shades with four complimenting plain colourways manufactured using pure undyed wools.

All Newhey products are manufactured with evobac, a secondary backing made from recycled plastic bottles. Compliant with all standard British and European regulations for flammability and performance, evobac also offers a comprehensive range of benefits for installers including ease of handling, which is guaranteed through decreased risk of scuffing skirtings and paintwork. Other key benefits are improved anti-fraying properties, reduced wear on blades when cutting and compatibility with all traditional installation methods.
