

newhey

Great British carpet since 1968

Stock Collection

# Lattice

Espresso in situ (mock up only)

## About the Collection

Lattice is a subtle cross-hatch design available in eight colourways manufactured in a heavy commercial specification at four metres wide, perfect for any high traffic area.

All our products are manufactured with evobac, a secondary backing made from recycled plastic bottles. Compliant with all standard British and European regulations for flammability and performance, evobac also offers a comprehensive range of benefits for installers including ease of handling, which is guaranteed through decreased risk of scuffing skirtings and paintwork. Other key benefits are improved anti-fraying properties, reduced wear on blades when cutting and compatibility with all traditional installation methods.

Front cover: Vintage in situ

Neptune

Vermillion

Espresso

Tempest

Pattern repeat (L):	1.03m
Pattern repeat (W):	0.68m
Width:	4.00m

All Newhey products can be transformed into area rugs with a selection of edge finishes to suit all tastes and budgets.

For more information please email customer services or call us on 01706 846 375.

One square metre prevents at least eight plastic bottles from going to landfill or entering our oceans.

## The benefits

Less risk of scuffing skirtings and paintwork.

Excellent underfoot comfort

Easier to cut, reducing wear on blades.

Compatible with conventional installation methods – stretch fit and double stick.

## How evobac is made

1 Plastic bottles are shredded into flakes.

2 The flakes are converted into tape and woven.

3 Next polyester fibre is needled into the woven tape.

4 The result — **evobac**.

## Our Story

Newhey Carpets is a leading British manufacturer of contract carpets for the hotel, leisure and entertainment sectors. Applying 50 years of manufacturing and technical excellence, the company constantly embraces the very latest production techniques in order to deliver reliable, high performance products to its global customer base.

Driven by innovation, Newhey uses a mix of yarns and colours to develop unique solutions for commercial interior designers, all backed up by market leading after sales advice and support. The company is also at the forefront of the carpet sector in terms of reducing its carbon footprint through the development of low embodied energy. Newhey's advanced backing system utilises a unique solvent free application process to apply the revolutionary evobac, which is produced from 100% recycled plastic bottles.
